# **SITUATION SUMMARY**

## **Possible Copper Phone Line Cut, Covelo, Mendocino County**

- On 08/27/15 at 1558 hours the California State Warning Center (CSWC) received a report indicating a possible fiber cut affecting the Covelo Central Office (CO) in Mendocino County. The Covelo CO handles 700 lines and 911 traffic. This office routes to the AT&T PSAP Mendocino County Sheriff.
- The CSWC made contact with Mendocino County Warning Point (WP) who advised cell phones are operational but land lines are down.
  - 911 lines have not been affected per the Mendocino WP.
  - The Mendocino County WP is the default PSAP for the Covelo CO.
  - The interruption only affects calls from landlines within the Verizon Covelo Central Office service area. Wireless calls are not affected.
- There is currently no estimated time of restoral.
- Per Karen Wong , Cal OES CA 911 Branch:
  - Verizon is looking for a potential copper cable break, they currently have technicians driving the cable route looking for any damage. The 700 line count is for the entire Central Office and this outage only affects customers served from Verizon's Covelo Central Office. Contact was made with Mendocino County Sheriff and made them aware we had an issue in the Covelo area and they will be kept informed as well.
- Per Cal OES Legislative Unit:
  - Sen. Mike McGuire represents this area which has experienced long-standing outages previously and is seeking legislative remedies to North Coast phone service/911 outage issues.
- Cal OES Duty Officers are gathering information and providing updates as they become available

# **SITUATION SUMMARY**

## **Northern California Weather Event**

The first significant storm system to impact the northern California Region since spring is on its way this weekend. Rainfall amounts for the coast are forecast to be the heaviest since April due to an unusually deep low pressure center moving close to the coast Friday night into Saturday morning. Rainfall will spread inland late Friday night into Saturday with the heaviest amounts of over an inch in the Curry County Coastal Mountains. Winds will also be gusty, especially over the coastal waters, the coast, and higher elevations of the eastside. Rain combined with cooler temperatures behind the cold front will improve the wildfire situation this weekend. Less wildfire smoke is then expected which should improve air quality this weekend into next week. Although rain will be welcome during this long drought, it will only have short-term benefits as soil moisture increases and river levels rise. Thunderstorms are not expected.

## **Impacts**

- Roads may be slippery due to accumulated oil on the road surface from the extended dry period
- Plugged culverts may cause local ponding of water
- Fire (and smoke) activity will diminish with this rain, but will likely not end

## **Forecast Confidence**

- Confidence is moderate
- Currently thunderstorms are not in the forecast, but they remain a possibility

## **Timing and Strength**

- A few spotty showers are possible Friday afternoon
- Friday night is the best chance for rain
- A few lingering showers are possible Saturday morning
- The highest rainfall amounts will be in the mountains of Del Norte county

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA**

A low pressure trough offshore will keep a dry southwest flow and some periods of high cloudiness over Northern California through tonight. Daytime relative humidity should be up a little bit today in the western areas, and tonight's recovery should be higher in all areas. Friday the offshore trough will be moving eastward and begin to bring cloudiness ashore during the day. Friday night the system will spread cloudiness inland and some light precipitation is expected to develop in the northwestern areas by early Saturday. Moderate, gusty south to southwest winds are expected this afternoon (gusts mostly 20-25 mph), then stronger southerly winds (gusts 25-35 mph) will develop over a larger area Friday night as the weather system moves inland. The system will continue moving east and weaken Saturday with some possible showers in the northern mountain areas. Much cooler, mostly sunny to partly cloudy days with overall higher relative humidity will prevail over the weekend. Afternoon maximum temperatures will drop about 10 degrees into the mid-80s in the warmer inland valleys. The trough will linger over the region through next week, but it will become weaker, with dryer, somewhat warmer conditions returning early next week. It appears likely to strengthen again the middle to end of next week for a change to cooler, somewhat breezy and higher relative humidity conditions. Areas near and downwind of the fires will continue to have degraded air quality issues, but better dispersion conditions and/or less smoke production are anticipated soon, and the smoky conditions are expected to show an overall improvement for many areas by early next week.

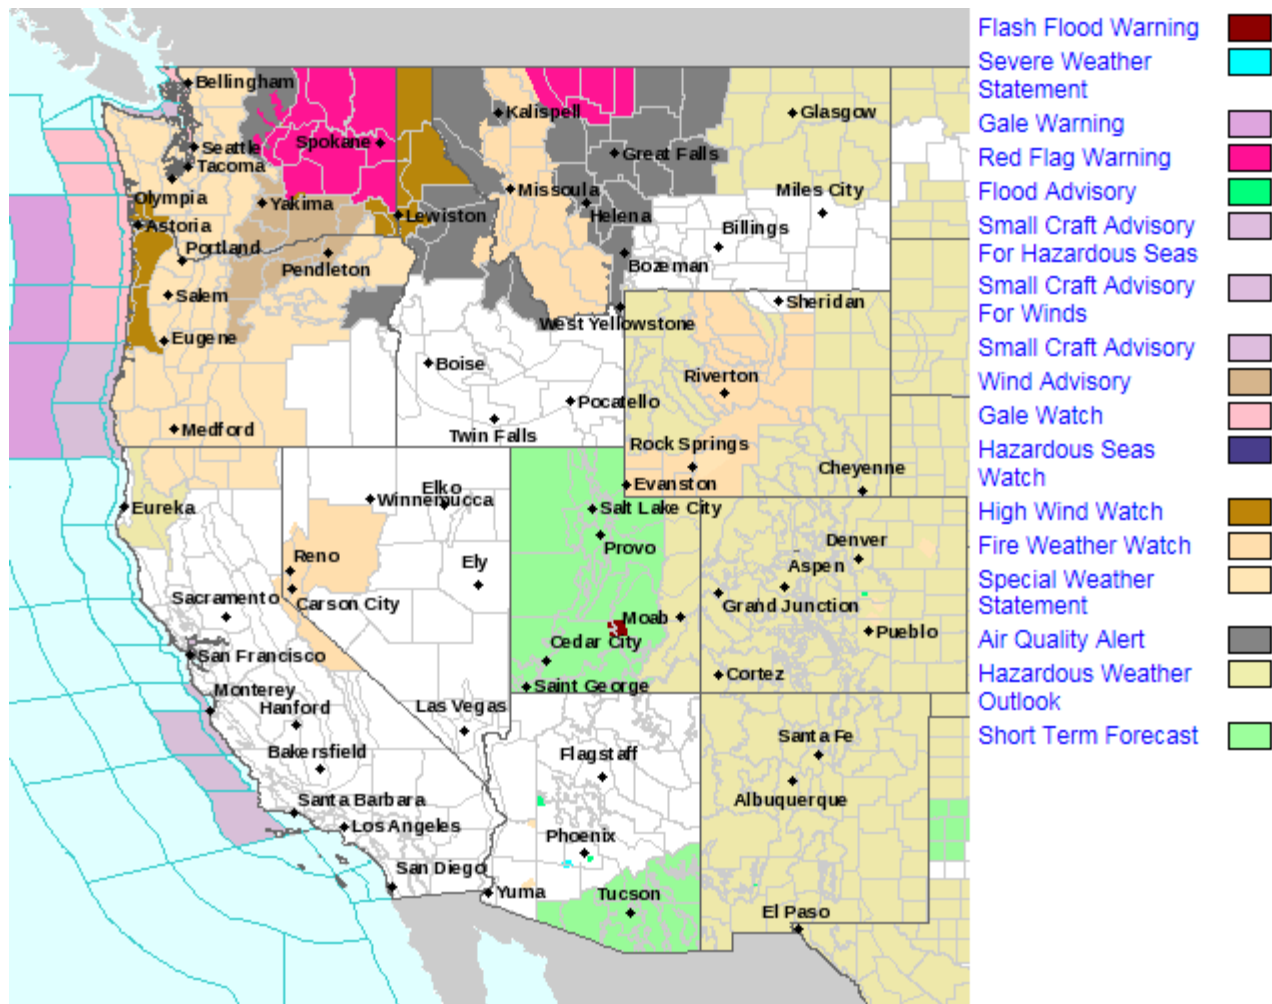

### **SOUTHERN CALIFORNIA**

High pressure over the southwest along with very light easterly flow will produce well above normal temperatures through the end of the week. Clear skies and light winds will allow temperatures to climb to near 90 at the coast and in the mountains from 5,000 to 7,000 feet, 100-105 in the valleys and up to 110 in the low deserts today and Friday. Minimum relative humidity will continue to be in the teens across most of the area outside the desert. Isolated storms will be possible in the deserts east of the Imperial and Coachella Valleys. No storms are expected after Friday. This weekend, a trough is expected to race through the Pacific Northwest and the northern part of the state. This will result in a return of cooler, onshore flow and more humid conditions in the mountains, particularly the Sierras. Light sprinkles may be possible near the Crest Saturday night when the trough passes by. Next week, a long-wave trough is expected to remain parked off the coast. This will result in sustained onshore flow, a deep marine layer and slightly cooler than average temperatures. Daily rounds of night and morning stratus will extend from the coast into the valleys which will give way to hazy afternoon sunshine next Monday through Friday. It will turn breezy in and near the deserts during the afternoon hours next week where some wind gusts to 40 mph are expected. The cool weather pattern is expected to last through the Labor Day weekend and no thunderstorms are expected through the first 10 days of September.

## FIRES, SOUTHERN OPERATIONS AREA

### Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and/or ICS-209 as of 08/27/15 at 1758 hours:

- 56,919 Acres, 25% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
  - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
  - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
  - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
  - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: Fresno County EOC is activated at Level 2 from 0730-1800.
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
